

Worlds Together

Your network. Beyond campus.

An international student network

Michelle Jiang / Smith College

The problem

Student networks stop at campus.

International students rely on scattered campus groups for housing, rides and people to meet.

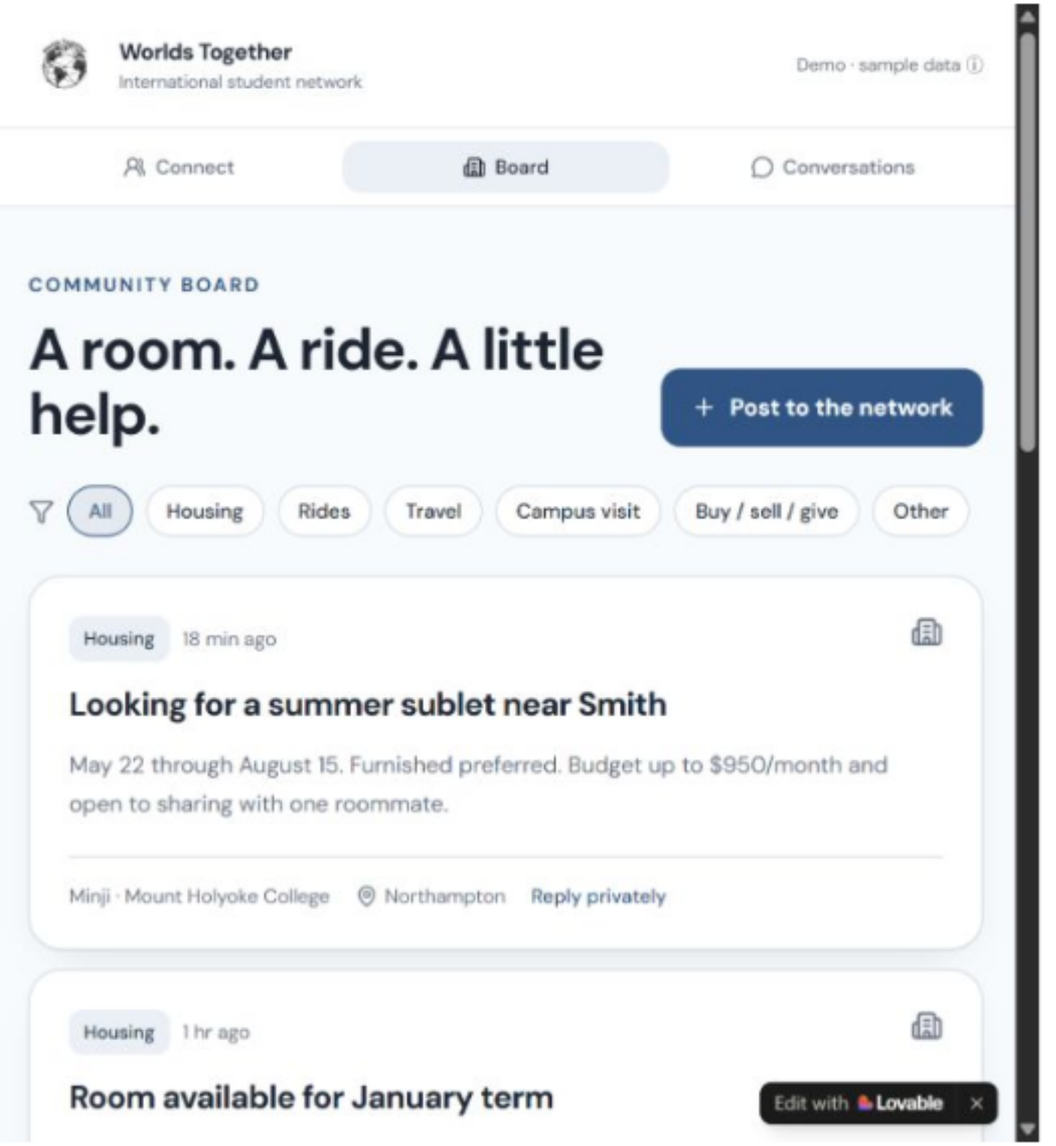

The solution

One network.
Across campuses.

Worlds Together connects international students through relevant introductions and shared local needs.

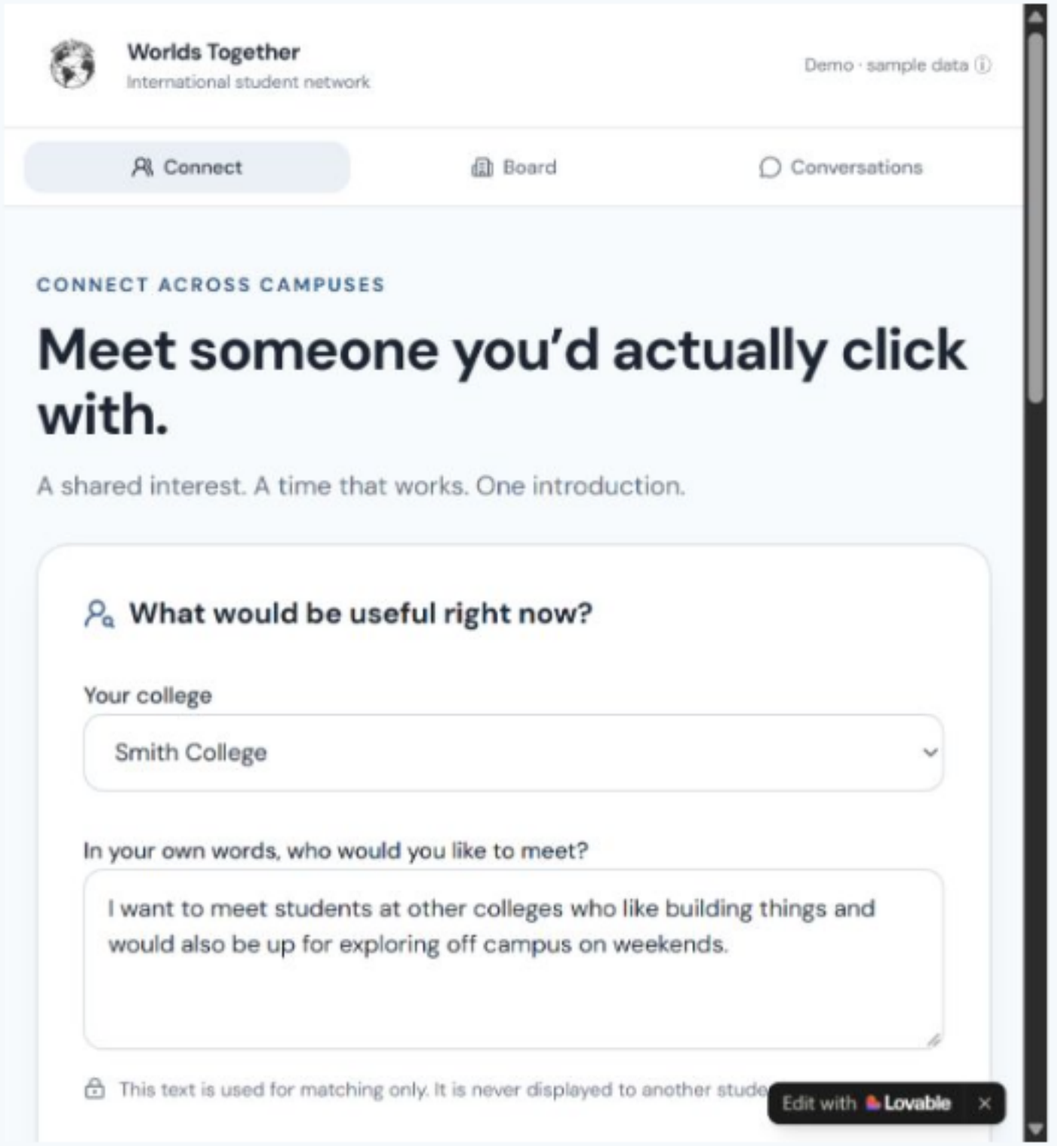

Product demo

Everyday help.
Across campuses.

Demo: one relevant introduction

Interests and availability shape the match.

International students enrolled in U.S. higher education

883,513

2024/25 / excluding OPT

First pilot: Five Colleges + nearby campuses

Recruit one local cohort through student communities.
Measure useful connections and whether students return.

IIE Open Doors 2025: 1,177,766 total minus 294,253 on OPT. Proposed pilot. No campus partnerships yet.

Proposed business model

Free for students.
Funded by campuses.

Students

Useful connections and local help without a subscription.

Potential campus buyers

International student offices supporting a new student cohort.

Next: test buyer interest and willingness to pay through a small pilot.

A student founder.
A working prototype.

Michelle Jiang

Sole founder
Smith College
Computer Science + Quantitative Economics

Built Worlds Together in React and TypeScript.
Previously built a civic-data workflow
used for 58+ field submissions.

2

informal student interviews

Interviewees expressed interest.
Pre-launch. No users, revenue
or funding yet.

From prototype to a useful network.

Prize funding would support

A controlled student pilot.
Verification and moderation.
Reliable, private introductions.

The proof to earn

Students find useful help.
They return and invite others.
Campuses see enough value to pay.
